**This program is intended to fix or repair problems that allow rainwater or runoff to get into the sanitary sewer system. Repairs or issues that do not allow rain water into the sewer system are not eligible for this program even though the problem might be related to sewer. For example, a cracked sewer service line would be eligible as it allows rain water in the sewer system. A clogged or obstructed sewer service line would not be eligible as it does not allow rain water into the sewer system.**

Nature of problem being fixed:

- Storm sump pump directly connected to sewer
- Storm sump pump with diverter valve directly connected to sewer
- Combination sanitary sewer/storm sump pump directly connected to sewer
- Area drains directly connected to sewer  
Please provide the number and location of area drains: \_\_\_\_\_  
\_\_\_\_\_
- Downspouts directly connected to sewer system  
Number of downspouts connected: \_\_\_\_\_
- Cleanout repair (not installation of new cleanout)
- Repair or replacement of sewer service line

By signing this application, I agree that all of the information provided is accurate, that I have read the information for the EPA Private Corrective Mitigation Program, and I understand the City of Parsons has the right to not participate in the cost of my repair in the event the repair does not qualify or there is no funding available. I further understand all payments by the City are made directly to the plumber and not the land owner.
